| Number of homes | 53 | Type of home | Apartment |
| System solution | Fully buried containers | Number of fractions | 7 |
| Fraction | Residual waste Cardboard Plastics Paper Metal Bio glass | Number of containers | 13 pcs. |

Description of the project

Kanalgården will be placed at an angle between Ørestads Boulevard and the newly built school. With its location, the property will be close to the two main traffic arteries in the area, Ørestads Boulevard and Hannemanns Allé, while creating a clear marking of the entrance area to Kanalpladsen and Royal Arena.
