

Mjølnerparken

Location	Nørrebro	Year of completion	2021 – 2025
Number of homes	650	Type of home	Residential, commercial
System solution	AWCS	Number of fractions	5
Fraction	Residual waste Cardboard Plastics Paper Bio	Number of wastemagaziens	40 pcs.
Tank type	PE-magaziens	Number of wasteinlets	40 pcs.
Pipe dimension	Ø355	Pipe material	PE100-RC Slurry SDR-17
Pipe length Approx.	605 m.	Number of containers	5pcs. 20-foot container

Description of the project

Mjølnerparken is today identified as a ghetto area with approximately 650 households that is undergoing urban renewal and renovation with the aim of opening up the area and integrating the project into the city. Aerbin helped the consultants to design the fraction solution, which has a total of 5 fractions. In addition to the central vacuum, Aerbin also provides fully buried waste solution for commercial waste and mini cardboard compactor.
