### Description of the project

Ny Søndervang is a new care center in Frederiksberg, which expands the district's existing nursing home with 105 care homes and 24 homes for residential care. Upon arrival at a residential floor in the care center, you are met by the activity around the dining room and kitchen with a generous and wide view out into the courtyard's 2 acacia trees. The first-hand experience is activity, socializing and the smell of coffee. The wide south-facing balconies show that outdoor living and contact with nature are prioritized.
