System solution	LAWCS/linen-chutes	Number of fractions	1
Fraction	Residual	Number of wastetanks	1 pcs.
Tank type	Screw tank	Number of inlets	8 pcs.
Pipe dimension	Ø315	Pipe material	PE100 Safetech PN 6.3
Pipe length Approx.	30 m.		

Description of the project

The care center, which is being built in the old part of Sydhavnen by Sydhavnsgade, Borgmester Christiansens Gade and Scandiagade, is on eight floors + basement and, in addition to care homes, contains communal kitchens, living areas, a roof terrace and associated service functions.

A total of 110 two-room homes and two smaller one-room homes will be built. All homes have their own toilet and shower. The nursing home is designed with the greatest possible focus on the elderly's everyday lives, ensuring residents feel safe and comfortable in their daily lives and close to the staff. The care homes are designed as private homes with as little institutional character as possible, while ensuring good working conditions for the care staff.
